Copy 2 of 6

30 October 1957

Dear Burt:

Attached is a memorandum prepared by Jim's people on the subject of the so called System #6. You will remember Dick B. discussed the concept of such a system with you during your last visit.

Will you look over the attachment and give us your views. If this reaches you in time, we can have additional discussions on this subject during your November 5 visit to our area. If not, please send us a preliminary proposal as soon as you have a chance to do so.

We are thinking about 5 to 10 of such systems to be ready for use next season. Liaison will have to be effected with Kelly's people re: placement of the antennas. Other considerations will no doubt occur to you.

Since Jim will not be available during the next several weeks and technical discussions necessary may be held with Jack I.

Hope to see you on the 5th.

Thanks,

George
